A group semaphore performance in Iwate Prefecture, Japan, which was devastated by the earthquake and tsunami of 2011.

DISPLACEMENT will amplify and contribute to the work of the Platform on Disaster Displacement (PDD) by cultivating artistic responses to the millions of people displaced each year around the world by disasters and the impacts of climate change.

DISPLACEMENT promotes an expanded discussion about disasters, climate change and displacement by bringing art research and practice to bear on international policymaking. Its activities include art interventions in government meetings, regional artistic dialogues, commissioned artwork, an online art gallery, and publications.

This collaborative project continues in memory of Professor Chris Wainwright (1955-2017), whose leadership and vision as lead curator and contributing artist guided the creation and development of **DISPLACEMENT**.
